The next Producer

I have always had a strong passion for Hip hop culture. In all spectrums of my work I've consistently tried to incorporate Hip hop since it's a big part of my personality.

During a period of time I have considered Spotify as a possible next step in my career so when this opportunity presented itself, it really spoke too my core!

I have always thrived in roles where I have been a leading part in small creative team. The essence of my work has always been to actualize creative ideas, both in a planning stage but also when an agile and sustainable execution is called for. I really believe that the benefit of working in small teams, is that it demands a higher level of creativity and ability to contribute where needed.

In my years of creative experience there have always been a high level of structure and coordination. Booking, planning and organizing has been important parts of my responsibility throughout my career. I have an eye for details and the difference that it can make regardless if it's in fashion, music or creating experiences.

As a person I would describe myself as somebody who strives for excellence in any project, I am a part of. I am quick in finding all kinds of solutions whether it is in solving problems or taking on new challenges.

I love to work towards ambitious goals and really values having fun during the process.

I look forward telling you more about how I can contribute to The Mogul team.
